LBC Bootstrap 4 Vanilla Theme

Files for integration inside croydon-theme-BS4.zip

Folder contents (PHP Demo)

The following templates and include files can be used as a starting point for integration. PHP has been used in this example purely to demonstrate include file structure.
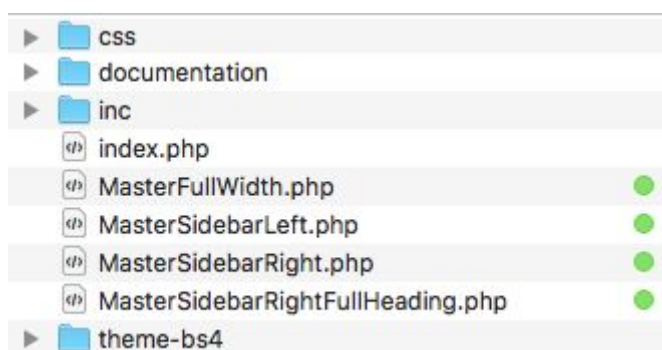

Files found in the zip that are not listed in this document make up the pages on the demo site: https://lbc-app-w-processwire-np.azurewebsites.net/bs4/ and can be used for reference or omitted.

Layout options - X4 Master templates (in root):

These templates display the 'shared' header and footer elements (details below) and define the 4 main template layouts, so should be the starting point for any page. Page content and sidebar content should be loaded into these templates dynamically.

|		
MasterFullWidth.php	Full width layout	View demo
MasterSidebarRight.php	Right sidebar layout	View demo
MasterSidebarLeft.php	Left sidebar layout	View demo
MasterSidebarRightFullHeading.php	Full width headline + right sidebar	View demo

Finder view in root:

Shared files (root/inc/shared/):

These include files are loaded into the Master templates (above) and should eventually be shared by all areas of My Account:

Include	Contents
inc/shared/1-HeadBody.html	HTML <head> to <body> (loads new theme)
inc/shared/2-SkipMain.html	Skip to main content link
inc/shared/3-MainNav.html	Main navigation (Pure JS)
inc/shared/4-BreadNav.html	Breadcrumb navigation
inc/shared/5-AccountBar.html	Account bar
inc/shared/6-PageHeadlines.html	Page headlines h1, p, keyline
inc/shared/7-Footer.html	2 row dark footer
inc/shared/8-FooterNav.html	Lower footer navigation
inc/shared/9-CookieAlert.html	The cookie alert bar (Pure JS)
inc/shared/10-ScriptsBodyHTMLClose.html	Call the Vanilla Javascripts ,close the <body> and <html>

```

Include file and markup example - 'Sidebar right' template:

MasterSidebarRight.php

[View demo](#)

```php
<!-- FULL WIDTH, Shared INCLUDES-->
<?php
// Include html header to opening body tag
include( "inc/Shared/1-HeadBody.html" );
// Include 'skip to main' link
include( "inc/Shared/2-SkipMain.html" );
// Include main navigation (pure javascript)
include( "inc/Shared/3-MainNav.html" );
// Include breadcrumb
include( "inc/Shared/4-BreadNav.html" );
// Include green account bar
include( "inc/Shared/5-AccountBar.html" );
?>

<!-- BEGIN TWO COLUMN RIGHT SIDEBAR PAGE LAYOUT-->
<!-- Site max width container-->
<div class="container-fluid bg-white site-max">
   <!-- Start row-->
   <div class="row">
       <!-- 'Main' page content -->
       <main id="main" class="col-8 order-1">

           <?php
           // Include page master headlines (h1, p, underline)
           include( "inc/Shared/6-PageHeadlines.html" );
           ?>
           <h2>Add your page include file here</h2>

       </main><!-- End 'Main' page content -->

       <!-- Right sidebar-->
       <div class="sidebar col-md-4 order-2">
           <h2>Add your sidebar include file(s) here </h2>
       </div><!-- End right sidebar -->

   </div> <!-- End row -->
</div> <!-- End max width container -->
<!-- END PAGE LAYOUT-->

<!-- FULL WIDTH, Shared INCLUDES-->
<?php
// Dark footer 2 rows
include( "inc/Shared/7-Footer.html" );
// Footer navigation
include( "inc/Shared/8-FooterNav.html" );
// Cookie alert bar
include( "inc/Shared/9-CookieAlert.html" );
// Call javascript, end body and HTML
include( "inc/Shared/10-ScriptsBodyHTMLClose.html" );
?>
```

## Adding 'Page' and 'Sidebar' content in the 'Master Templates'

Inside the Master templates you can include **'page'** and **'sidebar'** content inside the <main> and .sidebar containers.

For example the page: root/**WasteAccordionMenu.php** uses the following includes.

Include	Contents	Container
inc/pages/Waste/WasteItemPage.html	The Waste Item Page	<Main>
inc/SideBars/NavAccordionSideBar.html	The Accordion Menu Sidebar	.sidebar

REF: https://lbc-app-w-processwire-np.azurewebsites.net/bs4/WasteAccordionMenu.php

Finder view in root:

The '/theme-bs4/' folder contains all the assets for the theme.

/CSS/   Various CSS files including BS4 theme, font and icon CSS
/fonts/   Fiendstar and Icon font files
/img/   Favicons, SVG icons
**/JS/**   The Vanilla JS functions for the theme

DO NOT edit any files in the /theme-bs4/ folder

Any requests for editing and recompiling the Master Bootstrap 4 theme should be sent to david.hampton@croydon.gov.uk

Adding area specific CSS

Each area or project can contain a **'/css/custom.css'** file, this file is already loaded in the <head> section. The file is empty, apart from the necessary media queries:

Finder view in root:

The empty custom css file:

```css
/* CUSTOM CSS - PROJECT SPECIFIC */
/* Extra small devices (portrait phones, less than 576px)*/

/* Small devices (landscape phones, 576px and up)*/
@media (min-width: 576px) and (max-width: 767px) {}
/* Medium devices (tablets, 768px and up)*/
@media (min-width: 768px) and (max-width: 991px) {}
/* Large devices (desktops, 992px and up)*/
@media (min-width: 992px) and (max-width: 1199px) {}
/* Extra large devices (large desktops, 1200px and up)*/
@media (min-width: 1200px) {}
```
